ABOUT YOUR
JOURNEY**

B e s t B u s R e n t a l S e r v i c e i n U A E

CRB has developed a reputation for being the market leaders for bus rental service in UAE. We offer a huge range of specialist transportation services across the United Arab Emirates.

ABOUT US

We have been operating as a top Passengers Transportation Bus rental services in the United Arab Emirates for more than a decade now with an experienced management team who have been engaged in transport bus rental business. No matter what size group you have we have the resources to handle it. We are proud of the reputation we have built over the years and our performance has accumulated many records and are marching forward with a will for innovation and boosting our company.

With an unwavering dedication to quality and service, we are never satisfied until our clients are completely satisfied. Our services are constantly evolving to serve clients better to make our customers more comfortable. We serve in renting of various type of vehicle on short and long terms on contract basis.

We desire to fulfill all your transportation needs in a simple, hassle-free, and dedicated manner, while aspiring to build meaningful relationships with you that are based on integrity and mutual trust.

VISION

To set benchmark in public transportation industry with reliability, commitment and dedication.

MISSION

To continue providing our customers superior travelling and sustainability through our continued passion of providing enhanced transportation services.

OUR VALUES

We strive to provide exceptional customer service, customer safety, customer reliability, integrity & team work.

OUR SERVICES

OILFIELD MANPOWER TRANSPORTATION

The Oilfield Manpower Transportation in UAE is the main domain of CRB.

We have the capacity to manage transportation for 10,000 manpower in the Oil and Gas field per day. We are one of the trusted transport companies in Oilfield Manpower Transportation. Our company is in that business for a long period of time. With the help of friendly staff and plenty of transportation facilities, we become a professional and reliable transport company in UAE. We also have CNIA gate passes for various oil and gas fields which helps us facilitate the Oil and Gas companies and Construction companies working in remote sites.

GROUP SEAPORT TRANSFERS

No matter the need or place, CRB will provide your group with customized group Seaport Transfer services based on your itinerary. Regardless of your needs, we can meet and exceed your groups expectation of what professional charter bus service is about.

GROUP AIRPORT TRANSFERS

With charter bus service available for group air transfers in UAE, as part of our core services areas, we aim to fulfill any staff transfers for Airport Staff in the major cities of the UAE. We understand the unique needs of the Airports and offer 24-hour staff transfers services. Meet and greet services are available for large groups and each bus provided by CRB is assured to be licensed and permitted for the airport you desire service at.

BUS RENTALS FOR LONG TERM

At CRB we offer luxury buses, mini buses on rent for long term lease for all kinds of transportations in UAE. We offer various size buses with drivers for long duration such as Monthly & Yearly basis. This service is mainly geared towards the corporate sector. Our luxury buses can offer a comfy travelling experience in UAE.

BUS RENTALS FOR CORPORATE STAFF

A private bus makes it easy to streamline transportation at your next offsite meeting, team-building gathering, seminar, convention, trade show, or other business-related event. Whether you're out to impress important clients or treating your employees to a day out of the office, we'll find the perfect bus for your group at the best possible price. We aim to fulfil any staff transfers for various corporate offices like bank, hospitals shopping mall etc. We offer 15 to 30 seated buses with drivers for fast and efficient transfers from their places of work to their apartments.

BUS RENTALS FOR ON-SITE LABOURERS/ WORKERS TRANSFER

CRB also provide Bus Rentals for On-site Labourers/ Workers Transfer services in UAE. We provide both big and small sized buses to transfer laborers and workers from their camps to their work-sites and back on a daily basis. We aim to fulfil any staff transfers on time and offer 24 hour staff transfers services.

OUR FLEET

LUXURY BUSES

GOLDEN DRAGON

HYUNDAI UNIVERSE SPACE LUXURY

Universe has been tailored to satisfy the needs of passengers which come in a 28/41/43/45 Seating Capacity.

Monocoque Body

Universe has monocoque body enhancing structural rigidity and providing light-weight body construction. This contributes to reduction in vibration and better roll over protection.

Electro Deposition System

Hyundai has a large-capacity electrostatic priming tank that can accommodate the entire bus body, and it provides maximum corrosion protection by reaching previously unreachable areas.

Safety

Every noise and vibration had been traced, with emphasis on eliminating N.V.H from the design stages. Also features air suspensions, aerodynamic and highly rigid integral body. Superior low noise, low vibration, and high safety.

Air Conditioning

With the integrated air conditioner and centralized heater system, the cabin can be maintained. The air inside is ventilated and circulated to provide clean and fresh air all the time.

Under-floor heater (1 heater unit under the floor + Duct + Auxiliary heater)

Heating performance at rearmost passenger seat: 16°C 28°C. Noise is reduced by 8dB. Maintenance for heater unit and application of plug-in type filter.

OTHER FEATURES INCLUDED:

- Windshield glass defroster
- Roof Vent
- Sub heater under the floor
- Black bezel head lamp / Protrusion typed front bumper and fog lamp
- Two piece windshield glass / Parallel type Wiper / Standard outside rear view mirror
- Jake Brake

HYUNDAI EXPRESS NOBLE

Hyundai's CV buses prioritize dynamic performance. The Express Noble comes with a High Decker and a Powerful and economical D6 Engine.

Noble comes with Luxury beyond imagination with the Dashboard designed in Wood grain. With Multi-functional reclining seats, Power window and air conditioning controls, LED floor lamp, New fluorescent room lamp & Mood lamp & 2-row LED line light, Lid type shelves, Driver's additional overhead shelf, Swing-out type entrance & middle door, Integrated Air-conditioning system, Huge Baggage area and the Bus comes with Front / Rear aluminum wheels.

OTHER FEATURES INCLUDED:

- Clear head lamp
- Streamlined front bumper and fog lamp
- Rear bumper with reverse warning system (OPT)
- Chassis system controls
- Powertech engine
- Electromagnetic radiator
- ZF Retarder
- Auto slack adjuster
- Jake brake
- Gradual parking brake

MAN LION'S COACH

With MAN Lion's Coach long-distance buses and coaches, you can now travel with even greater comfort, reliability, safety and efficiency.

The new MAN Lion's Coach guarantees outstanding driving comfort, with a drive power of up to 510 hp. And all this with low fuel consumption and compliance with the strict emission standard Euro 5 or 6.

A lion you can always rely on. With its technically advanced components with long-term reliability and the comprehensive service offered by MAN, the Lion among coaches guarantees optimal vehicle availability and a maximum level of utilisation.

Reliability has a whole new meaning with MAN Lion's Coach. With its powerful Common-rail engines, perfectly tuned Gearbox and extended maintenance intervals, the Lion's Coach can now be on the move for longer, with more power and efficiency guaranteed.

A superbly designed and highly efficient driveline >> Combined with fuel-efficient assistance systems.

A Noticable reduction in time spent at workshop >> Thanks to the extended service intervals and the MAN service interval calculator.

Full light-emitting diode headlights >> That can take care of all light functions at the front and rear for increased active safety throughout the vehicle's service life.

Much higher resistance to corrosion >> As the innovative manufacturing process means there is no need for the engine compartment flap to have a steel frame (no compromise is made on dimensional stability as a result).

A new multi-part front panel concept >> With a significant improvement to the kinetics. Alongside the optimised operating concept, it is now easier to get hold of and replace individual parts, meaning that the costs of repairs and the time taken for servicing can be cut down.

As well as being a sound investment, the MAN Lion's Coach also guarantees maximum safety for all passengers thanks to innovative assistance systems, the torsion-proof skeleton with fire protection, and the bigger glass skylight, which makes it even easier to escape in case of emergency.

The cockpit has been revised too – it now features an even more user-friendly operating concept and helps to significantly increasing safety levels on journeys. Modifications to the interior for increased safety.

The ergonomically designed cockpit

Offers intuitive operation while driving, meaning that the driver can fully concentrate on the road.

The new, bigger glass skylight/emergency exit hatch

Features high UV filtration to protect passengers from the sun and offers increased safety by providing an easier option of escape in case of emergency.

New skeleton design in line with ECE R66.02.

- Torsion-proof skeleton with fire and smoke detection system
- Patented 'pipe-in-pipe' technology
- Use of high-strength steels
- Extremely stable roll bar with additional inner pipe near the B-pillar and at the rear

Innovative assistance systems

- Emergency Brake Assist (EBA)
- Electronic Brake System (EBS)
- Electronic Stability Program (ESP)
- MAN BrakeMatic® with brake control and cruise control
- MAN EfficientCruise® GPS-controlled cruise control
- MAN TipMatic®
- Lane Guard System (LGS)

MERCEDES BENZ TOURISMO

The Tourismo's distinctive design is timelessly elegant. Form and function work hand in hand and represent the basis for maximum efficiency.

Thanks to the aerodynamics of the high-decker, which have been improved down to the last detail, the fuel consumption gratifyingly low. Even the flush-mounted driver windows and AquaBlade windscreen wipers are not only visual highlights with their dynamic design, they also minimise fuel consumption and driving noise.

Tourismo is equipped with future-oriented engines and an innovative cooling system. Highly-efficient and light-liquid retarder brake uses engine coolant as both coolant and brake fluid. Thanks to this, there is no need for an oil/water heat exchanger or for brake retarder fluid to be changed. This means weight is reduced, leading to increased effective power output over long braking distances. As such, due to the maintenance-free brake retarder, not only does road safety increase, but maintenance costs also drop.

The anti-lock brakes system (ABS), which is now present on all buses, was first implemented on Mercedes-Benz buses.

All applicable systems of passive and active vehicle safety are involved in the Tourismo:

Traffic safety, instant response to dangerous situations, passenger protection in case of an accident, and measures to minimise the consequences of accidents.

When travelling by Tourismo bus, passengers enjoy excellent levels of comfort.

The passenger compartment of the bus is equipped to the highest standards. Thanks to the 2.01 m ceiling height, even the tallest clients feel comfortable in their seats. Travel Star seats regulated from the aisle side and manufactured especially for installation on tourist buses help customers to relax even for long-distance trips. Optionally, it is possible to install child seats with three-point seatbelts for long-distance routes.

To make journeys as comfortable as possible for passengers, there are foot rests, tray tables, luggage storage and even modern overhead electronic panels which passenger can use to adjust personal lighting and climate control and when it gets dark outside, sophisticated lighting in the passenger compartment creates a relaxed atmosphere.

SCANIA MARCOPOLO

Possessing a superbly engineered exterior and a quality interior, where attention to detail is paramount, Scania Marcopolo is fitted with luxurious leather seats and extensive noise insulation ensuring first class passenger comfort at all stages of the journey. Adding to the excellent design of the coach is Scania's fully engineered chassis that everyone recognizes and trust. Scania's chassis is not only renowned for its outstanding operating economy, it also benefits from Scania's legendary comfort, safety, and reliability credentials.

Superior and consistent build quality inside and outside follows Scania's standard global process with quality checks at every stage.

The Monocoque design of Scania Marcopolo allows for greater passenger comfort, optimal luggage space and an overall lower weight.

The Electrical components on the Bus are protected from moisture with rubber seals for greater reliability. Its Galvanised steel body with complete primer coverage and underbody coating application gives exceptional corrosion protection.

Extensive noise insulation throughout the entire vehicle yields quieter performance for a more pleasurable journey. Its fully engineered body results in a well-balanced vehicle in terms of load distribution and its Streamline design lowers drag which in turns reduces the fuel consumption as well.

THE FEATURES INCLUDED:

- Full air-suspension for exceptional comfort.
- Electronic Braking System (EBS)
- Traction Control (TC)
- Electronic Stability Programme (ESP)
- Lane Departure Warning (LDW)
- Tyre Pressure Monitoring (TPM)
- Steering wheel in exclusive black leather with wood trim.

KING LONG XMQ 6128

The King Long XMQ 6128 inherits the simple and attractive design of conventional buses. The exterior design, type K, exclusive to King Long, coupled with side panoramic windows, not only reveals its elegant appearance but high performance. King Long made many improvements to coaches based on user feedback to improve performance.

Designed for domestic and international travel, King Long's range uses only the best components and engine technology. All buses are equipped with a Cummins engine, giving the customer a reliable and sustainable clean, efficient solution. Equipped with a full range of technology options, the Cummins engines can meet all the needs in terms of global emissions. Despite its compact size, a clear sense of space and generosity emerges inside the XMQ6128. Its warm atmosphere contributes to the well-being of passengers and tourism seats allow them to sit comfortably even on longer trips.

Passenger comfort and convenience of the driver are at the forefront of all designs of King Long. Elegant and refined transmissions, a luxury cabin and quality, contribute to a comfortable journey for all. King Long offers spacious luggage compartment, accessible from both sides, in addition, it also has an excellent engine access. Optimized ergonomics, roominess worthy of coaches / buses are much more spacious, everything is designed to help your driver to carry out its mission.

All controls are within easy reach, while the visual and instruments are positioned in such a way so that the driver can see them easily. Spacious storage is provided for personal belongings. The cockpit can even benefit from air conditioning. King Long vehicles are designed around the customer in order to deliver a vehicle that will provide years of reliable service.

SUNWIN BUS SWB6860

Sunwin manufactures high quality coaches and city buses varying from 8.5m to 12m in length. Shanghai Sunwin Bus Corporation is a 50:50 joint venture between SAIC Motor, China's biggest vehicle manufacturer, and respected Swedish automaker Volvo.

Sunwin The 51-seater battery-powered vehicle has a highly reliable body technique tradition. It is equipped with 3-point safety belt and fully auto lifting mechanism for the handicapped ensuring more safety.

THE FEATURES INCLUDED:

- Cummins ISLe340-30/40 engine.
- ZF tech transmission.

- 19-inch & 17-inch colour LCD displays, front & rear towing hook, 2x 4kg fire extinguisher, USB mobile charger outlets.

ECONOMY BUSES

ASHOK LEYLAND FALCON

Every day for more than three decades, the Ashok Leyland Falcon Bus is trusted for carrying the workers who build our cities and the staff who keep the economy going. Best in class features and an unparalleled track record has made the Falcon the undisputed king of buses in the Middle East. Falcon is locally manufactured in the UAE from Ashok Leyland's Plant located in Ras Al Khaimah. Falcon is Euro 4 compliant and utilizes iEGR, a revolutionary technology developed exclusively by Ashok Leyland.

With 66 Seating capacity and ease of driving & Manoeuvrability it is built to outlast your needs. The Ashok Leyland Falcon has a Powerful Heating Ventilation and Air conditioning where the Air conditioning has been allocated its own separate individual Engine on every Bus. This allows the vehicle to overcome Heating up of the Main engine during hot season especially in the summers of the Gulf regional countries.

The Ashok Leyland comes with a proven H series CRS Engine, Rugged 5 Speed Gearbox and a Solid Chassis Frame and Tubular Structure. With its Panoramic Windshield and low Fatigue, it makes Ashok a very economical Bus with a sharp design.

The features included:

- Full Air Dual Lining brakes
- Roof mounted slave engine driven AC
- Floor mounted heating system
- Auxiliary brakes
- ABS system
- Power Steering
- 4" Weveller Front/Rear Suspension

HYUNDAI SUPER AERO CITY

The New Super Aero City simply radiates a sense of solidness. Its occupant can be in no doubt whatsoever that they are in the safest of hands.

Its secret: the truss type structure. So, centre frame is improved flexural and torsional rigidity than frame type structure. And the sturdy body, organized with one-piece type roof bows and enforced roof corner panel, provide extra stability and a wide range of safety factors - both active and passive - ensures the best possible protection for all occupants.

New Hyundai Super Aero City provides whatever the customers want, with superb exterior. Enhanced ergonomic design of driver's seat and instrument panel give you excellent experience of comfort as driving passenger car. From the city to the city, expanded wind shield area and vertical type MFR head lamps with newly designed fog lamps are not only helping safe driving but also offering luxurious feeling.

Hyundai has a large-capacity electrostatic priming tank that can accommodate the entire bus body, and it provides maximum corrosion protection by reaching previously unreachable areas.

Controlled brake is particularly advantageous while driving under slippery road conditions. With ABS/ASR, maintain full directional stability at all times and avoid dangerous situations. Large diameter and wider and thicker brake shoe guarantee braking performance. And integrated return spring improves durability.

Tubeless Radial Tire

The powerful 11R22.5-16PR size tires provide comfort driving and increase durability of vehicle.

Safe Entry Step

Lowered entry step makes it easy for physically handicapped and older passengers to get on the bus.

Large Windows and Rear View Mirror

Upper mounting typed double stay outside heating mirror improves visibility and appearance.

Gas Inlet

The check valve in the inlet prevents the reverse flow of fuel when fuelled.

PRD Valve (Pressure Relief Device)

It prevents to release gas from the car in an accidental fire.

Heating Unit

Roof-mounted electric fan deliver fresh air at any time passenger want.

Air Suspension Seat

Air suspension seat furnish more comfortable ride with less fatigue to the even though long distance driving.

Audio System

M600B High Class Audio system matches the interior acoustics of the new super Aero City for more pleasant trip.

TATA

Through a perfect synergy of dynamism and aesthetics, Tata Motors buses have consistently delivered on the promise of comfort and safety. These buses are equipped to handle the toughest terrains and offer efficiency, ergonomics and convenience to travellers and operators alike.

The buses are available in 64 seater option with unmatched features of excellent seating comfort with wider seats and reduced NVH (Noise, Vibration & Harshness), making it convenient and comfortable for its passengers. The comfort and ease of drive features make Tata buses an ideal choice for various applications ranging from school transport to sub-urban travel or as a staff & contract carrier.

Its Cummins B180 Engine is world class with SCR Technology gives you a superior performance. The extra seats help you with extra revenue.

The Tilt and Telescopic steering helps you with a better & effortless drivability.

The Features included:

- Weveller Semi elliptical leaf spring Front/Rear Suspension.
- Full air S-CAM brake system.
- Spring actuated parking brake system acting on rear wheels.
- Hydraulic double acting telescopic Shock absorbers.
- Power assisted hydraulic Steering.

MINI BUSES

TOYOTA COASTER

The Toyota Coaster offers enjoyable and relaxing travel for large groups. An advanced air conditioning system also provides a comfortable environment at all times and with Toyota's legendary quality, reliability and durability, Coaster is certain to be with you for the long haul. Practical and sturdy, the exterior design of the Toyota Coaster has been crafted to cope with the toughest of conditions. Mudguards at the front and rear protect the body of the bus and halogen headlamps provide excellent visibility of the road ahead to make journeys safer. Toyota Coaster's engines are mated to a five-speed manual transmission and power steering, offering agility and excellent fuel economy.

The 28-Seater coaster is also used as recreational vehicle all over the globe. The bus is very famous globally and the main reason behind the popularity of it is its strong body and large seating capacity in its class. The bus is equipped with air conditioning, power steering and automatic doors. A small refrigerator is also available. The Toyota Coaster offers enjoyable and relaxing travel for large groups. The bus will allow you to store the luggage easily and you can easily travel in the bus due to its spacious interior. Enhanced noise insulation enables passengers to enjoy talking during their trip. The extensive use of noise-absorbing and noise -absorbing & noise-insulating materials, including the floor panel covering the transmission, dramatically reduces noise reaching the interior from the engine compartment and outside the vehicle, creating a pleasant environment in which passengers can hear one another clearly.

THE FEATURES INCLUDED:

- Suspension stabilizers (Rear/Front).
- ABS (Anti-lock Brake system).
- SRS airbags (Driver's and front passenger's Seats).

- Rigid body that complies with rollover regulations.
- Ventilated Discs/Drums.
- UV-reducing green glass.

mitsubishi ROSA

FUSO's light duty bus offers additional safety and comfort features that can help detect certain driver errors ahead of time to prevent accidents, reduce risk of injury and increase driver and passenger confidence. LED headlamps provide better night-time visibility, Advanced Emergency Braking System (AEBS) and Electronic Stability Program (ESP) detect vehicle position and controls vehicle stability in the case of side slip or rollover, and Lane Departure Warning System (LDWS) helps drivers keep the Rosa and its passengers traveling more safely on freeways and local roads alike.

A revamped interior means drivers feel more at ease at the wheel, leaving them more energy and attention to focus on vehicle control throughout the entire day. Revised switches and instrument panel ergonomics now see controls effortlessly at hand, while Bluetooth audio makes hands-free calls possible. Passengers also receive an improved experience when riding the new Rosa, with redesigned seat materials and LED line lights. FUSO's Rosa light duty bus can be deployed in a variant that enables operators to match capacity and efficiency to maximize business benefits.

Economy

Performance, utility, longevity: FUSO engines have it all. Smooth-shifting transmissions enhance fuel economy.

Design and Drivability

Aerodynamic contours increase fuel efficiency. Drivability and comfort keep drivers fresh and alert.

Service and Support

Easier, less frequent maintenance plus outstanding service and sort mean more time on the road.

GOLDEN DRAGON KAST

Kast 31-Seater premium business coach boasts better acceleration performance and generates much less noise. A trial operation of Kast premium business coach shows that it takes less than six seconds for the vehicle to accelerate from a complete standstill to a speed of 40 km/h and less than ten seconds from 0 to 60 km/h. In addition, passengers barely experience any sudden unstable movements while on board.

Golden Dragon has gone over a great deal of efforts in cutting down the noise generated by the vehicle by conducting a thorough investigation of engine mount bracket, chassis and various joints of the vehicle body. A noise test shows that Kast premium business coach has cut the noise level by an average of 7 dB compared with that of its predecessor.

With an obvious sedan-like dashboard and luxury furnishings in the passenger areas, Kast premium business coach assumes a strong business air and immediately inspires awe. Some small details such as the colour of the dashboard, the size of the glass window and the shape of the air outlets, speak volume of Golden Dragon's relentless pursuit of high craftsmanship.

Kast premium business coach is equipped with a tailor-made 4.8L Engine and six-speed automatic transmission gearbox coming from a U.S based Manufacturer 'PSI Corp'. With this engine the coach delivers more powerful performances and achieves higher fuel economy. Another highlight of Kast premium business coach is its slim body. With such an agile body, it is also equipped with an eddy current retarder and front and rear stabilizer bars, both of which have significantly raised the safety standards of the vehicle when it is braking and steering at a high speed.

ASHOK LEYLAND OYSTER

Ashok Leyland OYSTER – is a new generation BS6 midi-bus launched in the premium segment for best in class safety and comfortable travel. OYSTER is a multi – purpose premium bus, designed and manufactured in-house, for Staff, Route and Tourist application. With proven iGen6 'H' series engine, OYSTER offers higher fuel mileage and low maintenance.
